

Setting up Personal Email on the iPod Touch

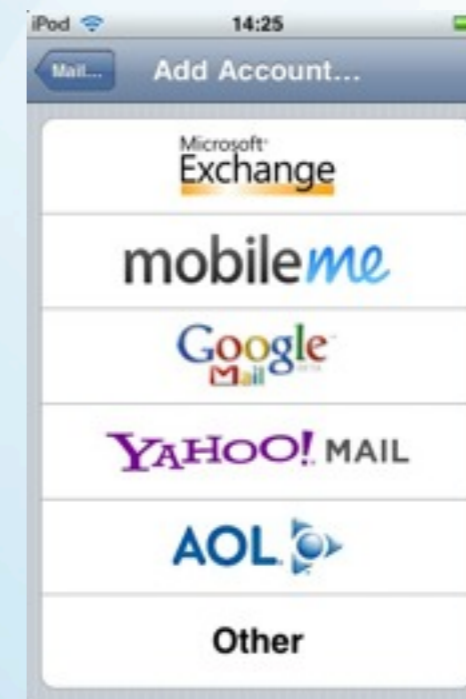

If you have not yet set up a mail account on the iPod Touch, you can do so by choosing the **Mail** icon

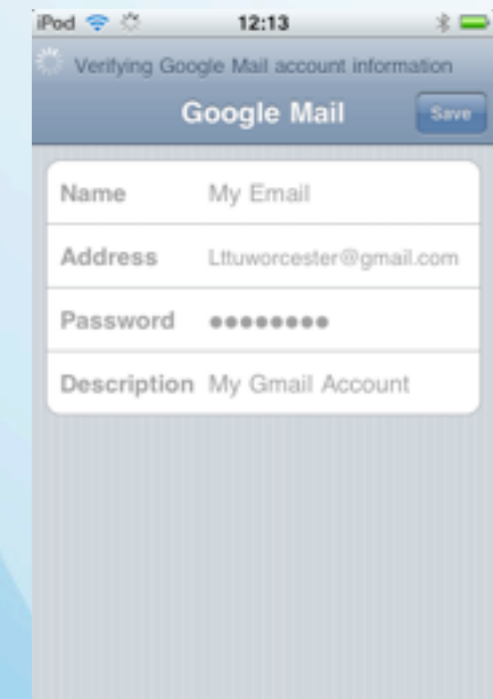

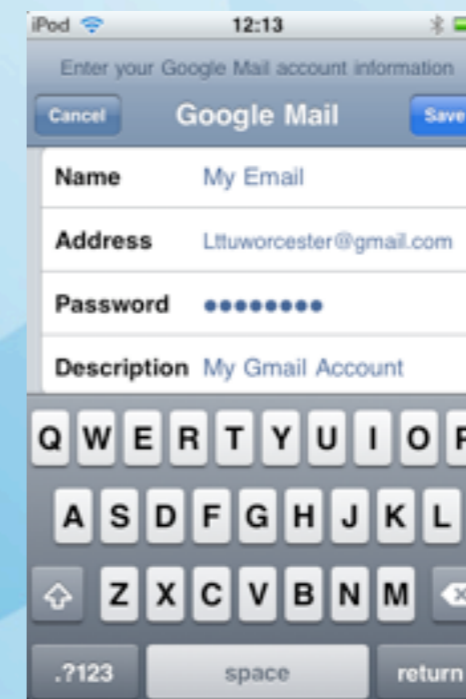

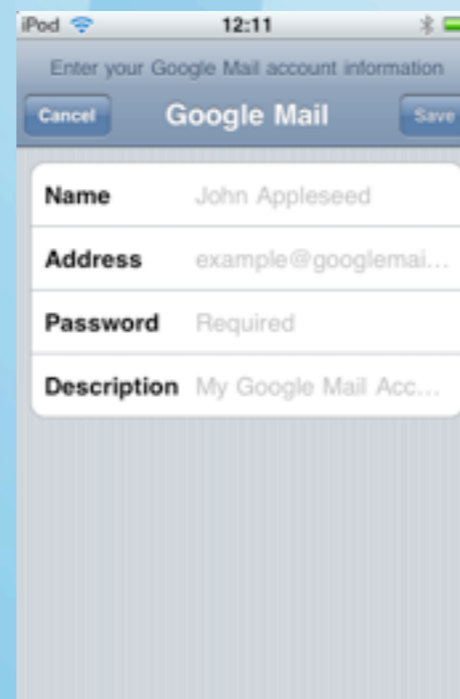

Additional accounts can be set up by choosing the settings icon from the home screen, and then choosing **Add Account**

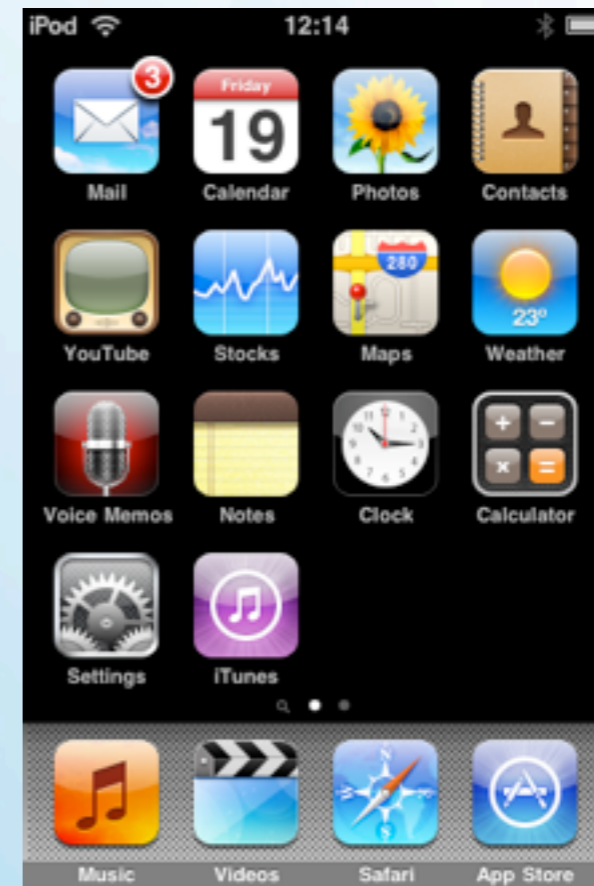

Choose the email service you wish to set up
(for this example we are using [Google Mail](#))

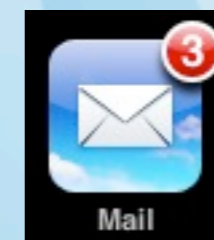

Enter a name for this account,
the email address and password
for your account along with a
description and choose [Save](#)

Once your account details have been verified, you will be able to send and receive emails from your iPod Touch

New, unread email is represented just above the Mail icon in the home screen - in this example, 3 emails are outstanding

For further help and information in using the iPod Touch at the University of Worcester, please contact eos@worc.ac.uk
