

ResNet Quickstart Checklist

[version of 18/11/11]

In order to get you on-line and enjoying the service as quickly and as painlessly as possible, please make sure you have the following information and software available when setting up your new connection.

Important items and information you'll need:

Credentials:

- Your network login ID / user name.
- Your network password.

Critical Software:

- Anti Virus software - updated and scheduled to run a daily check and virus definitions update at least once a week. Users with no anti-virus protection may be banned from using the service
- System Updates – please ensure your Operating System is fully updated (ie. Windows Updates for Windows, Software Updates for MACs)

Hardware Requirements:

- A CAT5 network cable, as provided by the University of Worcester.
- A working network card in your PC or laptop

Additional Information

- Please familiarise yourself with the University's ICT Regulations which are available on the University of Worcester's website here:
<http://www.worc.ac.uk/ils/documents/Regulations.doc>

Once you've followed the quick start guide you'll hopefully have access to the University web pages.
