

PGCE PRIMARY SUBJECT BOOKLET

Providing an overview of areas covered
within each core and foundation subject at
university-led training

2023-24

For trainees, tutors, mentors, class teachers and
lead mentors

Introduction

The integration of training experiences is crucial to success for trainee teachers. The curriculum is at the heart of education and ensuring trainees appreciate the significance of subject specific pedagogy is a key part of their training.

At the University of Worcester, trainees are taught by subject specialists and their curriculum understanding is enhanced throughout the building, enriching and thriving stages through a carefully sequenced programme that is mapped to the ITT Core Content Framework. The mapping shared here is simplistic in nature to support the accessibility for school colleagues. If you would like to see more detailed mapping, please contact the Partnership Team.

To support mentors in school, we have created this subject booklet to promote a shared understanding of what aspects of each subject trainees will have discussed at each stage and how this supports their progress within our ITTE curriculum.

Each subject page will show the progression of knowledge, understanding and skill throughout the training journey. It will highlight how this links to the 8 areas of the UW ITTE curriculum that you will be formatively assessing trainees against during their school experience placements. The key literature underpinning the content is outlined and we hope this will support school colleagues with their own professional development and learning alongside promoting the integration of training.

Key:

PB	Professional Behaviours
BM	Behaviour Management
P	Pedagogy
C	Curriculum
A	Assessment
CT	Critical Thinking
IDG	Inclusion, Diversity and Global Citizenship
RW	Resilience and Well-being for All

Furthermore, this booklet also includes specific lesson observation guidance and a knowledge organiser for each subject. The lesson observation guidance provides prompts for each subject to focus on when a mentor is observing the trainee. On the next page, you will find the generic lesson observation guidance to be used alongside the subject specific lesson observation guidance. The knowledge organiser highlights the key knowledge a trainee is expected to know within that subject by the end of the course.

OBSERVATION GUIDANCE

When undertaking observations of lessons, class teachers, mentors and SE tutors should consider the following prompt questions to help highlight strengths/areas of development related to the practice observed:

The Planning Process - Does the planning:

- Reflect the appropriate statutory programme of study relevant to that age group (e.g., N.C./EYFS framework)?
- Show an awareness of prior learning and previous (and potential) misconceptions?
- Clearly identify learning objectives and success criteria?
- Take into account the needs of all learners with a clear focus on how these will be addressed?
- Have a clear focus on appropriate subject content (see additional subject guidelines for observations)?
- Provide opportunities for the children to be actively engaged in their learning and verbalise their thoughts and ideas?
- Indicate how additional adults will be deployed throughout the lesson?

Learning and Teaching - Does the lesson:

- Allow the children to be actively engaged in their learning (e.g., through hands-on experience/multi-sensory learning, asking their own questions and engaging in peer/class discussion where appropriate)?
- Provide appropriate resources to support learning?
- Allow all children to access learning and provide them with appropriate challenge?
- Ensure that the correct subject specific vocabulary is being consistently modelled and the children are encouraged to apply this vocabulary to their learning?
- Allow for modification of the plan to ensure all pupils can make progress?
- Give the children the opportunity to communicate their learning appropriately (for example through discussion, demonstration, presentation, completing work or sharing outcomes from their learning in other ways)?
- Ensure the additional adult(s) is/are clear of their role in developing learning?

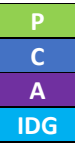

Assessment

Does the student (or teacher):

- Provide opportunities for on-going assessment (AfL) throughout the session? Are these appropriate to the focus of the lesson and for the learners involved (e.g., through questioning, observing the children, use of photographs, written/visual work)?

- Judge well when to intervene and support learning (e.g., asking questions to prompt further thinking and next steps in learning, address common misconceptions)?
- Give appropriate feedback (verbal/written) to the children to develop their learning?
- Record the children's learning in an appropriate manner?
- Reflect on the outcomes of the lesson as a whole in terms of the children's learning as well as their own?

In the pages following this one there is subject specific guidance to help mentors and tutors when observing across the range of curriculum areas. Please use this guidance in addition to the generic guidance above.

Subject:	English
Completed by:	Sharon Lannie
Statement of Intent:	Trainees are entitled to develop their knowledge, skills and understanding in English, whilst exploring subject specific pedagogies, policies, and research. This is the foundation for trainees to plan and teach a carefully sequenced, purposeful, and coherent primary English curriculum.

ENGLISH LESSON OBSERVATION GUIDANCE

Please use this guidance alongside the generic guidance for lesson observations.

Does the student:

- Model good spoken and written Standard English?
- Have good English subject knowledge to inform a well-planned and well taught lesson (e.g., good grammatical knowledge, knowledge of children's literature etc.)?
- Demonstrate interest in, and enthusiasm for English?
- Model the learning effectively throughout the lesson?
- Explore vocabulary within context and encourage interest in, and discussion of, key/new words?
- Use high quality texts on occasions as a stimulus and promote reading for enjoyment? Does the lesson:
- Have a clear focus on developing aspects of English taken from the NC or EYFS (i.e., Spoken English, Reading, Writing or Communication and Language)?
- Ensure that children have planned opportunities to use spoken language (both speaking and listening) in a meaningful context?
- Provide opportunities for the children to encounter and use new vocabulary in their talk and, where appropriate, written work?
- Provide pupils with the opportunity to respond to key questions, elaborating upon their answers and explaining their understanding?
- Contain planned opportunities for the student to model and share effective learning?
- Provide opportunities for children to improve/proofread/redraft/edit their work (where appropriate)?

Have high expectations for accurate spelling and grammar use (both verbal and written constructions)?

SYSTEMATIC SYNTHETIC PHONICS (SSP) LESSON OBSERVATION GUIDANCE

Does the trainee demonstrate fidelity to the systematic synthetic phonics (SSP) scheme adopted by the school?

- Have they engaged in discussions with expert colleagues to develop their understanding of the scheme and the approaches used in the school?
- Do they use the terminology identified in the scheme?
- Do they understand the principles underpinning the programme of synthetic phonics?
- Are resources and props linked to the scheme?

Has the trainee engaged with the scheme planning?

Before teaching:

- Have they annotated the plan before teaching to support their subject knowledge and delivery?
- Have they considered questioning and how they will identify and manage any misconceptions?
- Have they identified the needs of individuals within their class and considered how they will support all learners to make progress (including learners with SEND or pupils learning EAL).
- Have they identified how the TA will be deployed (if relevant)?

During the Lesson:

- Is there a clear objective for the lesson which has been shared with the pupils?
- Does the trainee ensure that pupils practise phonemes already taught in previous lessons?
- Is the lesson interactive and does the trainee ensure all pupils participate fully?
- Does the trainee demonstrate an understanding of the nature of the English alphabet code?
- Does the trainee articulate phonemes correctly?
- Are children required to articulate phonemes themselves?
- Are the children taught the name of the letter, when dictated to by the scheme?
- Does the trainee model clearly how to read and write the new GPC?
- Are pupils taught the correct letter formation?
- Are the children taught how to read and write (blend and segment) the new GPC, using decodable words, phrases, sentences and books?
- Is there evidence of new learning?
- Are children given tasks that allow them to practise and apply what they have been taught to read and write?
- Does the trainee make the most of the time for teaching and use activities that maximise the number of words children read and spell?
- Does the trainee use formative assessment throughout the lesson to assess pupils' progress and determine next steps, including identifying children who might need immediate extra support?

After teaching:

- Has the trainee annotated the plans after teaching, noting down formative assessment observations in order to respond to the needs of learners (plan interventions/support/scaffolding/challenge)?
- Have they reflected on the lesson and will this support the trainee to develop their practice?

National Curriculum

Statement of intent: Trainees are entitled to develop their knowledge, skills and understanding in English, whilst exploring subject specific pedagogies, policies, and research. This is the foundation for trainees to plan and teach a carefully sequenced, purposeful, and coherent primary English curriculum.

The national curriculum for English aims to ensure that all pupils:

- read easily, fluently and with good understanding
- develop the habit of reading widely and often, for both pleasure and information
- acquire a wide vocabulary, an understanding of grammar and knowledge of linguistic conventions for reading, writing and spoken language
- appreciate our rich and varied literary heritage
- write clearly, accurately, and coherently, adapting their language and style in and for a range of contexts, purposes, and audiences
- use discussion in order to learn; they should be able to elaborate and clearly explain their understanding and ideas
- are competent in the arts of speaking and listening, making formal presentations, demonstrating to others, and participating in debate.

English Knowledge Organiser

Assessment in English

Statutory assessments in English including TA of writing and writing moderation and exemplification materials.

Practice in English is underpinned by the OFSTED English review: The curriculum breaks learning down into component parts, which are assessed formatively.

Teachers use information from this assessment to adapt the curriculum.

Feedback to pupils is specific and provides them with a 'recipe for future action'.

Teaching focuses on building pupils' prerequisite knowledge rather than on practice for answering examination questions.

Inclusive Practice in English

Inclusive practice is embedded across all sessions and aligns with teaching on the 'Inclusion, Diversity and Global Citizenship' strand.

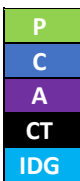

Teaching English is viewed through the lens of responsive teaching according to pupil need.

Key Vocabulary

- Systematic Synthetic Phonics
- Decode/Encode
- Phoneme/grapheme
- Reading for pleasure
- Composition and transcription
- Word reading
- Reading comprehension
- Vocabulary, grammar, and punctuation
- [Vocabulary associated with spelling appendix 1](#)
- [Terminology within GPS Appendix 2](#)

Key Pedagogies and Theories

- ⇒ Our English curriculum provides a systematic, rigorous, and critical introduction to pedagogies relevant to the teaching of English, theories, and subject knowledge.
- ⇒ A range of learning theory is explored in relation to English pedagogical approaches, including Chomsky, Bruner, Vygotsky, Skinner, as well as Gough and Turner, Cremin (Teachers as Readers and Reading for Pleasure). Students learn to teach early reading using SSP, and develop an understanding of the research and policy, as well as the pedagogical approaches associated with high quality phonics provision.

MATHEMATICS OBSERVATION GUIDANCE

When undertaking observations of mathematics lessons, class teachers, mentors and SE tutors must consider evidence of the 'Perfect 6' (University of Worcester, 2018) seen in planning, teaching and learning.

Please consider the following prompt questions to help you highlight strengths/areas of development related to the practice observed:

CPA (Concrete-Pictorial-Abstract) Representations

- How is the conceptual understanding of mathematics being developed with children (as opposed to only procedural understanding)?
- In what ways are varied and appropriate representations (concrete, pictorial and abstract) used by the teacher to support the children's understanding and reasoning?
- In what ways are varied and appropriate representations (concrete, pictorial and abstract) used by children to support/demonstrate their own understanding and reasoning?

Misconceptions

- How are potential errors and misconceptions planned for, explored and discussed?
- How are mistakes valued as a learning tool?
- How are language/resources/ explanation used accurately?

Questioning

- How effective are questions in promoting mathematical thinking, reasoning and understanding?
- How is questioning used to help to assess the depth of children's understanding and reasoning?
- To what extent are children encouraged to ask their own questions and promote mathematical curiosity?
- How effectively are the chosen examples used to support children's understanding? (e.g., 23×6 is good for demonstrating a written method, whereas 19×6 better worked out mentally)

Language and Talk

- Is correct and accurate mathematical vocabulary modelled by the teacher and then used by children? How and when?
- How is focused mathematical talk planned for and used as an effective pedagogy?

Problem solving and reasoning

- To what extent are children encouraged to reason, explain and justify their thinking?
- How effectively are planned opportunities for reasoning and problem solving integrated into lessons?
- Do children try out ideas, take risks and learn from mistakes?

Making connections

- To what extent does the teacher make connections with relevant areas of mathematics?
- To what extent are children given the opportunity to link and articulate their learning with relevant areas of mathematics?
- To what extent does the teacher make connections with previous learning in mathematics?
- How clearly does the teacher break the concept down into steps that can be understood by the children (i.e., in a progressive order)? Is the teacher aware of different levels of difficulty within a concept?

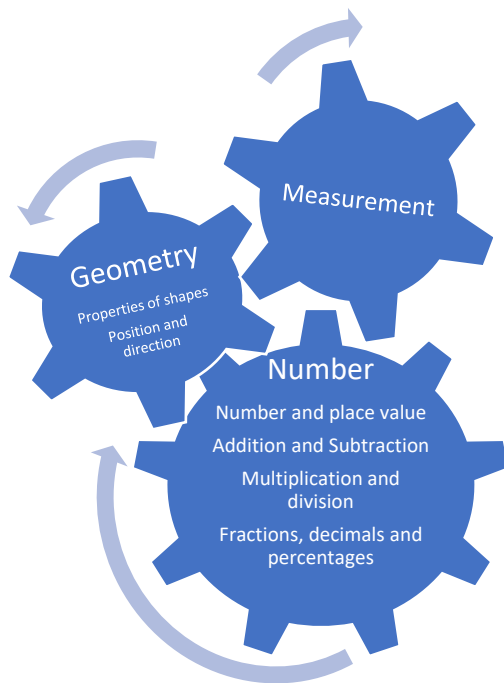

National Curriculum

National Curriculum Aims

All pupils become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.

All pupils **reason mathematically** by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language

All pupils can **solve problems** by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Knowledge developed within the curriculum can be considered to be: Declarative, Procedural and Conditional
See [Ofsted mathematics research review](#)

Mathematics Knowledge Organiser

Assessment in Mathematics

The purpose of assessment is to effectively inform learning and teaching. It is important to recognise that pupils should take an active role in in this process.

Effective strategies for AfL in mathematics:

- Challenging activities
- Meta cognitive questioning
- Anticipating and diagnosing errors and misconceptions
- Marking and feedback

See [Hodgen, J. and William, D. \(2014\) Mathematics Inside the Black Box: Assessment for Learning in the Mathematics Classroom](#)

Inclusive Practice in Mathematics

Be mindful of:

- Mathematical Learning Difficulties and Dyscalculia which will impact on learning and applying mathematical facts and procedures
- Cognitive difficulties such as weak memory, speed of processing and organisational skills
- Speech, Language, and Communication difficulties
- Attitude, anxiety, and motivation

Make **suitable adjustments** such as use scaffolds, 'chunk' information, provide worked examples, pre-teach, develop reasoning from known facts to derive unknown facts, do retrieval practice, supply memory aids, display key vocabulary, and give additional learning time. Finally, always teach concepts using both **visual and verbal information**.

See <https://www.stevechinn.co.uk/maths-explained> for overview of dyscalculia and maths anxiety.

Key Vocabulary

Glossary of mathematical terms
[national-curriculum-glossary](#)

Key Pedagogies and Theories

The Perfect 6 is designed to inform teaching which enables all children to be successful, develop conceptual understanding with a focus on mathematical structures and through a range of representations.

The three representations are used so that all children of all ages develop conceptual understanding.

Concrete – manipulatives/ objects to handle: **Pictorial** – drawings, diagrams, images: **Abstract** – mathematical notation and language.

Mathematical vocabulary is used accurately by both the teacher and the children. Mathematics lessons have a focus on talk and discussion.

Open questions are asked that stimulate mathematical thinking and discussion e.g. Can you explain your thinking? Is there another way? Why did you...?

Children are encouraged to ask their own questions to clarify understanding or to develop a line of enquiry.

In line with the aims of the national curriculum, problem solving, and reasoning are integral to every lesson.

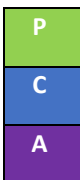

Making mathematical connections, rather than seeing mathematics as a series of unrelated facts to be learnt, supports learners' schema development and embedded understanding. This may involve

- Coherence (breaking learning down into small sequential steps)
- Conceptual and procedural variation

Misconceptions are planned for, exposed, and openly discussed.

Subject:	Science
Completed by:	Karen Blackmore
Statement of Intent:	<p>Trainees will be able to scaffold and facilitate young learners' understanding of the world around them, by drawing on key scientific concepts.</p> <p>Student teachers will also be adept at fostering and developing children's practical skills to enable them to undertake scientific investigations and inquires stimulated by their own natural curiosity (Ofsted, 2013).</p> <p>This approach will empower our trainees with the skills and knowledge to enable their young learners to successfully make the transition to the requirements of KS3 study and beyond. In this way we aspire to make a significant contribution to increasing the scientific literacy of society as a whole.</p> <p>For school-based trainees, the science pedagogy is integrated within their current practice, where multiple opportunities are present for sharing pedagogical approaches within a variety of school contexts and learner needs. To facilitate this, different science topics are taught within sessions to maximise cross-linking of key concepts across all three disciplines within the National Curriculum.</p>
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Introduction to the structure and content of the N.C. for science (DfE, 2013) and the EYFS framework (DfE, 2021) • Scientific enquiry as a lens for teaching curriculum content. • During taught sessions student teachers design and undertake their own inquiries and interrogate their efficacy in terms of meeting curriculum outcomes, throughout the entire age range from EYFS (birth -5 years) to upper key stage two (10-11 years). • Pedagogy – collaborative scientific enquiry, underpinned by a social constructivist framework. • The majority of sessions are taught around a focus of specific science topics, with the conceptually less demanding material prefacing more demanding topics. Topics taught are: <ul style="list-style-type: none"> ○ Scientific enquiry (pedagogical), Outdoor Education and Living Organisms including Risk Assessment and Health and Safety, Humans as organisms, Science organisation: resourcing and logistics (pedagogy), Evolution and Inheritance, Light and Energy, Science subject knowledge audit (subject knowledge enhancement) <p>❖ Links to the CCF: Standards 3 and 4</p> <p>Key Research/Reading:</p> <p>⇒ Loxley, P. SCIENCE OBSERVATION GUIDANCE

When undertaking observations of science lessons, class teachers, mentors and SE tutors should refer to the science content mind map below and consider the following prompt questions to help highlight strengths/areas of development related to the practice observed:

Planning

- Is there a clear focus on an appropriate aspect of 'Working Scientifically'?
- Is there a clear focus on appropriate subject content for the science topic?
- Does the planning reflect the appropriate resourcing of science materials?

Teaching

- Are there opportunities for children to shape the learning? (e.g., by asking their own questions, engaging in peer discussion, or designing their own scientific inquiries)
- Are the children actively engaged in their learning through 'hands-on, minds on' scientific enquiry in the form of a practical lesson?
- Does teaching allow all children to access learning and provide them with appropriate scientific challenge?
- Is the correct science technical vocabulary being consistently modelled? Are children encouraged to apply this vocabulary to their learning?
- Are the children given opportunity to communicate their developing scientific findings and ideas?
- Does the student teacher judge well when to intervene and support learning? (e.g., asking questions to prompt further scientific thinking and next steps in inquiry)
- Is there evidence that the student teacher has a strategy to identify and/or address common scientific misconceptions?

Science Observation Prompt Sheet

Planning

- Prior Learning
- Working scientifically
- Science Content
- Clear Learning Outcomes
- N.C. EYFS links

Teaching

- Flexible Scientific Communication
- Child Led opportunities
- "Hands on Minds on Learning"
- Appropriate Resources
- Scientific Vocabulary

Assessment

- Manage Learning
- Supportive Feedback
- AfL Strategy
- Address Misconceptions

Access/ Challenge - Needs of All Learners

Science knowledge organiser

National Curriculum

Working Scientifically – approach used to teach material across all three science disciplines.

<p>Asking questions Asking questions that can be answered using a scientific enquiry.</p>	???
<p>Making predictions Using prior knowledge to suggest what will happen in an enquiry.</p>	🗨️
<p>Setting up tests Deciding on the method and equipment to use to carry out an enquiry.</p>	📋
<p>Observing and measuring Using senses and measuring equipment to make observations about the enquiry.</p>	🔍
<p>Recording data Using tables, drawings and other means to note observations and measurements.</p>	📝
<p>Interpreting and communicating results Using information from the data to say what you found out.</p>	📢
<p>Evaluating Reflecting on the success of the enquiry approach and identifying further questions for enquiry.</p>	⚙️

Key Scientific concepts taught in an inter/intradisciplinary manner in order to forge explicit links.

Scientific knowledge is socially constructed and evolving rather than fixed. It is based on key scientific “Big Ideas”
For primary science this is informed by Harlen et al (2010)
<https://www.ase.org.uk/bigideas>

Key Pedagogies

Teaching Primary Science
Promoting Enjoyment and Developing Understanding
THIRD EDITION

Peter Loxley
Lyn Davies
Linda Nicholls
Babs Dore

Emphasis on Enquiry Based Science Education (EBSE) which builds on children’s natural *curiosity* as advocated by Ofsted 2013 & 2021.
[research-review-series-science](https://www.gov.uk/government/research-review-series-science)

Pedagogies focus on child centred learning and children identifying themselves as scientists.

The key to success whilst adopting the pedagogies above is the timely teacher identification of key scientific misconceptions and deployment appropriate remediation strategies.

Assessment in Science

Underpinned by seminal Teacher Assessment in Primary Science (TAPS) research at Bath Spa University.

Inclusion in Science

Follows the principles of Inclusion by Design (IBD) across the pedagogy including AfL. [what-is-inclusive-design-principles-and-examples](https://www.gov.uk/government/research-review-series-science)

Key Vocabulary

Scientific inquiry and topic technical terminology e.g. *scientific equipment* and *sound waves*.

Subject:	PE
Completed by:	Rhys Pritchard
Statement of Intent:	<p>The design and intent of the PE curriculum at the University of Worcester is to marry up subject and pedagogical knowledge to create a student body that possesses strong pedagogical content knowledge within PE. The curriculum introduces many theoretical ideas and notions that can inform pedagogical practice (e.g physical literacy, game centred approaches, motivational climate, aims and values of PE, assessment and inclusive practice). Using a theory to practice approach, a focus on transferring classroom pedagogy to PE is explored to ensure the content is purposeful for the trainee's future practice. Throughout the design of the curriculum expertise is drawn on from staff with extensive EYFS experience, Secondary colleagues and research active staff to help inform the forward-thinking approach to pedagogy and that the entire primary curriculum is considered.</p>
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Although exploring theory, there is a greater focus on the trainees' practical application of the key subject areas of gymnastics and games during the building phase. • Trainees develop a knowledge of the STEP principles, inclusive practice, and assessment strategies in PE, whilst being introduced to underpinning pedagogical approaches in PE such as physical literacy and game-centred pedagogy. • Trainees are encouraged to apply their classroom practice into the PE environment. <p>❖ Links to the CCF: Standards 3, 4 and 6</p> <p>Key Research/Reading:</p> <p>⇒ Morgan, K., Bryant, A., Edwards, L. and Mitchell-Williams, E. (2018) 'Transferring primary generalists' positive classroom pedagogy to the physical education setting: a collaborative PE-CPD process', <i>Physical Education and Sport Pedagogy</i>, 24(1), pp. 43-58.</p> <ul style="list-style-type: none"> • Building on their first school experience, trainees explore how to create a mastery motivational climate in PE and apply it to dance and athletics. • Underlying principles built on in the building phase such as assessment and inclusive practice will be embedded throughout. <p>❖ Links to the CCF: Standards 3, 4, 5 and 6</p> <p>Key Research/Reading:</p> <p>⇒ Morgan, K. (2017) 'Reconceptualizing Motivational Climate in Physical Education and Sport Coaching: An Interdisciplinary Perspective', <i>Quest</i>, 69(1), pp. 95-112.</p> <ul style="list-style-type: none"> • Whilst on placement, trainees work with expert colleagues to apply and embed pedagogical approaches and curriculum knowledge. Through deconstruction of lessons and reflections trainees refine and enhance their practice in PE. <p>❖ Links to the CCF: Standards 3, 4, 5 and 6</p>
<p>UW Curriculum</p> <p>Links</p> 	<p>Key Research/Reading:</p> <p>⇒ Randall, V. & Fleet, M. (2021) 'Constructing knowledge in primary physical education: a critical perspective from pre-service teachers', <i>Curriculum Studies in Health and Physical Education</i>, 12(1), pp. 20-35.</p>

PHYSICAL EDUCATION OBSERVATION GUIDANCE

Does the lesson clearly cover one of the National Curriculum aims?

- Clearly identified within their planning.
- The national curriculum does not specify sports; therefore, this should not be a focus.

Is the lesson objective and success criteria clearly displayed and articulated?

- As with all other NC subjects, this should be a pre-requisite.
- A consideration of how this links to the activities and intended learning of the children should be interrogated.

Are activities contextualised?

- For example, if focusing on dribbling, do all children have a ball and are dribbling in a clearly demarcated space where they are having to avoid one another, therefore having to respond to different stimuli, as they would in a game.
- Or are they lined up one behind another taking it in turn to dribble in and out of cones?
- We need high activity time for the children, reduced queueing and contextualised activities.

Is exploration encouraged?

- Across all activity areas children should first be encouraged to explore.
- Rather than prescribe how they should move, pass or kick, provide the opportunity for them to explore movements/ skills.

The importance of questioning.

- Ask the children what and how questions rather than telling.
- This will enable the children to share their understanding and support the trainee to develop this further through thought provoking questioning.

Learning is not linear.

- A warm-up, drill, skill and possibly a game at the end is not required as a lesson model.
- Children do not need a warm-up, but if one is required, it needs to be linked to the lesson/activity focus. This is another learning opportunity.
- Encourage the students to explore the pedagogies that they have been introduced to at university.

Transferring classroom pedagogy.

- Draw on what the trainees do well in the classroom and encourage them to transfer it into the PE environment.

The national curriculum for physical education aims to ensure that all pupils:

1. Develop competence to excel in a broad range of physical activities.
2. Are physically active for sustained periods of time
3. Engage in competitive sports and activities
4. Lead healthy, active lives.

Subject Content- Key Stage 1

Pupils should be taught to:

- Master basic movements including running, jumping, throwing and catching, as well as developing balance, agility and co-ordination, and begin to apply these in a range of activities
- Participate in team games, developing simple tactics for attacking and defending
- Perform dances using simple movement patterns.

Subject Content- Key Stage 2

Pupils should be taught to:

- Use running, jumping, throwing and catching in isolation and in combination
- Play competitive games, modified where appropriate [for example, badminton, basketball, cricket, football, hockey, netball, rounders and tennis], and apply basic principles suitable for attacking and defending
- Develop flexibility, strength, technique, control and balance [for example, through athletics and gymnastics]
- Perform dances using a range of movement patterns
- Take part in outdoor and adventurous activity challenges both individually and within a team
- compare their performances with previous ones and demonstrate improvement to achieve their personal best.

PE Knowledge Organiser

Assessment in PE

Focus on a supportive and formative approach to assessment

Trainees explore and embed Assessment for Learning practices within their teaching with a focus on pupil personal improvement as opposed to outcome. Use of video and photos are explored to encourage children to take responsibility for their learning.

Key Pedagogies and Theories

Our Physical Education curriculum explores a variety of PE concepts which are theoretically informed and underpinned. Taking a theory to practice approach, these pedagogical approaches and theories are drawn on:

- Athletic Skills Model
- Fundamental Movement Skills
- Physical Literacy
- Motivational Climate
- Game Centred Approaches (Game Sense, Tactical Games Model etc)
- Rosenshine's Principles of Instruction
- Vygotsky, Bruner and Bandura

Key Vocabulary

- Fundamental Movement Skills
- Balance, co-ordination, speed, agility, strength, endurance, jump, hop, leap, 2 handed strike, catch and throw
- Tactical Understanding
- Contextualising practice
- How, what, where, when and who (when questioning).

Inclusive Practice is embedded across the curriculum; however, trainees use the STEP Principles to support their practice.

Space: Where the activity is happening

Modify the space by increasing or decreasing the area in which a task is to be performed or changing the distance or areas in which to score points.

Task: What is happening?

Modify the task by changing the demands, the rules of the activity, the number of times the child is to repeat the task, teaching cues, direction/level/pathway of movement or length of time to complete the task.

Equipment: What is being used?

Modify the equipment by changing the size of the target, level of equipment, amount of equipment, height of the equipment or the arrangement of the equipment.

People: Who is involved?

Modify the people involved by having children work alone, with a partner, bigger teams, smaller teams, as leader or follower, on different activities, or in a small group.

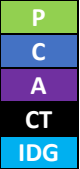

Separation

Integration

Inclusion

Subject:	History
Completed by:	Rose Hill
Statement of Intent:	<p>At University of Worcester, the vision of history is two-fold.</p> <ul style="list-style-type: none"> • Children are history detectives. To do this, trainees will be encouraged to develop the skills of investigation, challenge and debate amongst the children: the ‘bones of being a historian’ (Doull et al, 2020, p.7). • History is every story. (Beale, 2021). Our curriculum should “be designed so that pupils ‘see themselves’” (OFSTED, 2021, p.30). Teaching history in this way not only develops a stronger sense of identity and belonging but also “learning about the richness of the past” can help “to overcome sweeping generalisations or misconceptions” (Ford and Kennett, cited in OFSTED, 2021 p.29).
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Unpicking the Curriculum and understanding disciplinary concepts. • Diversity and planning for Enquiry. ❖ Links to the CCF: Standards 1, 2, 3 and 4 <p>Key Research/Reading:</p> <p>⇒ Doull, K., Russell, C. and Hales, A. HISTORY OBSERVATION GUIDANCE

Questions to consider for history lessons:

Enquiry Questions

- Does the lesson begin with an enquiry question which is linked to the National Curriculum?
- Is the enquiry question used to develop a specific disciplinary concept?
- Is enquiry embedded throughout the lesson?

Retrieval Practice

- What strategies are being used to support pupils to recall and remember key information?
- How do these strategies build progressively on previous learning and provide links to new learning in history?

Knowledge and Understanding

- Is the substantive knowledge clear and accurate? (*This includes content about people, places, events and chronological understanding.*)
- Are substantive concepts being developed within the lesson? Are these aligned to the school's long-term plan for history? (*Substantive concepts include but are not limited to: empire, invasion, resistance, democracy etc.*)
- How is a specific disciplinary concept (second order concept) being developed within the lesson? (*These include: causation, consequence, significance, interpretation, similarity and difference, historical evidence, change and continuity.*)
- How is chronological understanding being developed within the lesson? (*For example: timelines, 'meanwhile elsewhere . . .' activities, developing a sense of historical period.*)
- How are historical sources being used within the lesson? (*For example: artefacts, replicas, written documents, pictures, photographs etc.*)

Adaptive Teaching

- Which strategies are being used to support the historical understanding of pupils to access the lesson?
- Which strategies are being used to challenge and stretch the historical understanding of pupils?

Assessment

- How is the progress of pupils being assessed during and at the end of the lesson? (*Questioning, debate, discussion, response to enquiry question*)
- **Cross-Curricular Links**
- Are there meaningful links to other foundation or core subjects?
- How are creative approaches being explored?

National Curriculum

Disciplinary Concepts: Understanding how to develop disciplinary concepts such as causation, consequence, significance, similarity and difference, interpretation, historical evidence and change continuity.

Substantive Concepts: Teaching history through revisiting and progressively building on children's understanding of substantive concepts such as invasion and resistance; society and democracy. As well as embedding enquiry and chronology into history teaching and learning.

Substantive knowledge:

ELG: Past and Present:

Children at the expected level of development will:

- 1) Talk about the lives of the people around them and their roles in society;
- 2) Know some similarities and differences between things in the past and now, drawing on their experiences and what has been read in class;
- 3) Understand the past through settings, characters and events encountered in books read in class and storytelling.

Key Stage 1

- Significant individuals
- Events within living memory
- Events beyond living memory
- Significant events and people in own locality

Key Stage 2

- Changes from Stone Age to Iron Age
- Romans and their impact on Britain
- Anglo-Saxons and Scots
- Anglo-Saxon and Viking struggle for power
- Local History Struggle
- Study beyond 1066
- Ancient Civilisations
- Ancient Greece
- Non-European Society

History Knowledge Organiser

Assessment in history

"...bring together learning that has taken place rather than bolted on at the end of a 'topic'"
(Brown, Burnham. 2014, pp10)

End of Enquiry Tasks:

- Answer the Big Question .
- Make links between Substantive (historical knowledge) and Disciplinary Knowledge (how to think historically).
- Enable the children to shape historical arguments.
- Independent. (i.e. minimal teacher input!)
- Fun/Exciting/Creative!

Examples of End of Enquiry Tasks

Inclusive Practice in history

How can we help children to overcome barriers to learning in history?

<https://scale.wp.worc.ac.uk/>

Key Vocabulary

- Substantive knowledge
- Substantive Concepts
- Disciplinary concepts (second order concepts)
- Enquiry
- Chronological Understanding
- Fingertip/sticky knowledge
- Diversity and Representation
- Decolonisation

Key Pedagogies and Theories

What is Enquiry-Based Learning (EBL) in history?

- Exploring and evaluating the use of EBL in history.
- Embedding enquiry questions
- Structuring historical enquiry

- Asking/forming an historical question;
- Searching for evidence;
- Examining evidence;
- Recording evidence;
- Interpretation and comparison of different sources;
- Synthesis of historical argument – what can we conclude from what we have and why?

(Dixon and Hales, 2014, pp19)

Creativity in History.

"There is no history of mankind. There is only an indefinite number of histories of all kinds of aspects of human life." (Karl Popper, 1945)

- Exploring creative approaches whilst maintaining the uniqueness of history.

Key Aspects of Creativity

Asking Questions – "taking time to reflect, being curious, recognising, identifying, accepting problems."

"identifying and asking open questions to investigate problems, which may raise new questions"

Possibility Thinking – Open mindedness.

Imagination – essential for creative thinking. "It is a thought process that establishes a new idea – seeing other possibilities."

Risk Taking – "to consider surprises rather than expect what may be predictable."

Collaboration – using communication to foster creativity.

Reaching conclusions? – do we need an end goal to be creative?

Knowledge – Creativity is not knowledge-free.

Subject:	Geography
Completed by:	Jacquie Hine
Statement of Intent:	<p>Trainees are entitled to develop their knowledge, skills and understanding in geography. They explore subject specific pedagogies to be able to plan and deliver a carefully sequenced and coherent primary geography curriculum.</p> <p>Trainees will gain a knowledge and understanding of the principles of geography and how to teach them, the objectives for teaching geography from the National Curriculum/EYFS and additional frameworks for teaching geography e.g., the UN Sustainable Development Goals, Eco Schools and the Geography Quality Mark.</p> <p>Trainees will develop skills in planning and assessing geography, teaching geography through creative approaches such as enquiry are balanced with sessions including field work, map skills, the teaching of distant places and natural disasters, which enables them to motivate pupils and teach effectively.</p> <p>Trainees will be encouraged to think creatively and critically within a subject through discussions with expert colleagues.</p>

GEOGRAPHY OBSERVATION GUIDANCE

Please consider the following prompts to help highlight strengths and areas of development related to practice observed.

- Language and talk
- Is key geographical vocabulary modelled by the teacher and used by the children?
- Is questioning encouraged through the lines of What, Why, When, Where and How?
- Planning
- Is appropriate reference made to EYFS/N.C.?
- Has the planning been adapted appropriately to take account of the needs of specific learners? Have misconceptions been addressed and opportunities used to deepen knowledge and understanding of geographical principles e.g. migration/ knowledge of a place?
- Is there development in the progression and depth of response to geographical questioning and enquiry?
Has the trainee built on prior knowledge of pupils?
- Are trainees looking for links to CCF/ UW curriculum when delivering geography teaching including links to Global Citizenship and Diversity and inclusion?
- Is there consideration of Place, Space, Scale and relational thinking specifically connected to geography?
(Works by David Lambert can be used as a reference point if needed)
- Are trainees aware of what the children have learnt in the lesson, and have they considered next steps for progressing geographical skills?
- Progression of Learning
- Are pupils aware they are learning geographical skills and content?

Are pupils able to articulate that they are in a Geography focussed lesson?

National Curriculum

Key Ideas for effective geography are underpinned by:
Lambert

- Developing contextual Knowledge (relational and environmental thinking)
- Understanding processes that give rise to human and physical features
- Competence in geographical skills (including fieldwork) to collect, interpret and communicate geographical information

This is enhanced by recognising Powerful Knowledge and the impact of E.D. Hirsch.

(Informed by Lambert, Young and Roberts)

1. What is 'powerful knowledge'?

Absolutist ('traditional') view of knowledge
Fixed; to be transmitted.

Social constructivist view of knowledge
Dynamic; reflects power relations of society.

Powerful knowledge (social realism)

- Michael Young (formerly a social constructivist).
- Knowledge can be ascribed a value by society due to the *processes* of knowledge-making and knowledge claims.
- Knowledge offers explanatory power or can allow new ways of thinking about the world.
- Knowledge is dynamic and open to challenge.
- Access to knowledge – social justice.

1. An argument for a subject-based curriculum

2. Principles for designing a geography curriculum

Geography Knowledge Organiser

Assessment in Geography

Monitoring progress at different timescales

Scale/focus	Practice, e.g.:	Progress and standards
Short term: day to day	AfL classroom practice, e.g. questioning, formative feedback/response etc	Evident in teaching and learning, in pupils' ongoing work, response to feedback etc
Frequent: basic knowledge/skills	Short test, identified piece of homework More in-depth marking	Progress check (confidence vs. concern?) – can give you a number
Half/Termly: conceptual, procedural knowledge	Short research task, problem-solving exercise etc Access to work at particular standards – e.g. display Peer/self assessment	Criterion marking and feedback linked to pitch/age- related expectations
Long term: Year/Key Stage: substantial, conceptual development	A major piece of work – e.g. enquiry, DME, ext writing. End of year/key stage: perhaps synoptic, drawing learning together	As above, plus opportunity to develop portfolio of geog work exemplifying & sharing standards and illustrating progress.

Underpinned by key findings about assessment for high quality geography
Geographical Association
[Assessing-progress](#)

Inclusive Practice in Geography

Follows the principles of Inclusion by Design (IBD) across the pedagogy including AfL. [what-is-inclusive-design-principles-and-examples/](#)

Includes creative pedagogies to model varied ways of teaching geography e.g. P4C, mysteries and silent debate.

Key Vocabulary

- Place
- Space
- Scale
- Relational/ critical thinking
- Environment
- Field work
- Geographical information systems
- Sustainability
- Powerful knowledge

Key Pedagogies and Theories

Geographical theory:

Lambert: Lambert, D. Teaching Geography Spring 2007, pp 9-10 *Included because of its pre-eminence and significance in developing the OFSTED research review.*

LANGUAGES OBSERVATION GUIDANCE

'... unlocking the world and its cultures'

Ofsted (2021)

'Since there are a variety of ways that schools can construct and teach a high-quality languages curriculum, it is important to recognise that there is no single way of achieving high-quality languages education.'

Ofsted (2021)

Reflect on the following questions to support professional practice.

1) Are plans carefully structured and sequenced to build systematically on prior learning, enabling purposeful progression for all?

2) Are there opportunities for:

explicit teaching

intentional learning

meaningful assessment?

3) Do plans include clear links to: National curriculum in England: languages programmes of study - key stage 2 (DfE, 2013)?

4) Are there opportunities for pupils to:

be inspired, motivated, challenged and experience creativity?

be exposed to carefully planned and tailored use of the target language that builds systematically on prior knowledge?

make connections between phonics, vocabulary and grammar as part of their learning?

develop listening and reading (comprehending language) and speaking and writing (producing language) abilities over time?

practise, use and revisit language, including in different contexts?

demonstrate their knowledge, skills and understanding?

engage with carefully chosen resources?

develop cultural awareness and deepen their understanding of the world?

feel successful in their learning and know how to make progress?

5) Are assessment approaches valid, meaningful and aligned to a carefully structured and sequenced curriculum?

6) Are there opportunities for pupils to engage with salient, focused and clear feedback?

7) How does assessment impact on planning, teaching and learning?

Subject:	Art, Craft and Design (ACD)
Completed by:	Kaytie Holdstock
Statement of Intent:	The University of Worcester curriculum for art and design aims to give trainees the skills they need to inspire authentic creativity in primary school. They will learn how to give children starting points from which to develop their own, individual journeys, learning the practical, disciplinary and theoretical skills of the art curriculum along the way. Our trainees will consider the place of the art curriculum through lenses of diversity and inclusion and recognise the importance of the visual arts in the development of children’s mental wealth.
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> ⇒ What is Primary Art? An introduction to the EYFS, National Curriculum and the visual elements that underpin the subject (line, shape, colour, pattern, texture, form and space). ⇒ Exploring different subject specific pedagogies to support children’s progress through the practical, disciplinary and theoretical domains of artistic knowledge. ⇒ Links to the CCF: Standard 3 <p>Key Research/Reading:</p> <ul style="list-style-type: none"> ⇒ Eisner, E. ART, CRAFT AND DESIGN (ACD) OBSERVATION GUIDANCE

Art lessons should form part of a sequence where children explore, develop ideas, try new things and arrive at something new. This process should be evident in their sketchbooks.

Within the sequence:

Are children developing their **PRACTICAL** understanding of art, craft and design?

- Are the children using technical artistic language e.g) the 7 elements of art?

(colour, line, shape, form, space, pattern and texture)

- Is it clear which artistic specialism is being developed?

(Drawing, painting, sculpture, ceramics, photography, printing, collage, graphics, site-specific art, textiles, design, craft)

- Are children being given opportunities to practice and perfect their skills before applying them to more divergent tasks?

Are children developing their **THEORETICAL** understanding of art, craft and design?

- Are children being inspired by a diverse range of art and artists?
- Do children understand where these artists fit into the history of art?
- Do children have an understanding of what has come before in the discipline they are exploring?

Are children developing their **DISCIPLINARY** understanding of art, craft and design?

- Are they exploring the multiple ways that art can exist e.g) that “drawing” can mean many things.
- Are the children expressing opinions and making comparisons with the art they are engaging with?
- Is there opportunity for children to make links between the artists they are studying and others that they know?
- Are children encouraged to engage in “big questions” of art?

Are children being given the opportunity to become:

FLUENT (practice makes perfect!)

EXPERIMENTAL (by trying out new ideas)

AUTHENTIC (by expressing their own feelings and understanding of a subject or topic)

ASSESSMENT

Development of ideas should be evident in sketchbooks. Children should be encouraged to demonstrate their artistic thinking through their own annotations and self-assessment.

The children’s outcomes should demonstrate **DIVERSITY OF RESPONSE**

National Curriculum

“A high-quality art and design education should **engage, inspire** and **challenge** pupils, equipping them with the knowledge and skills to **experiment, invent** and create their own work”

KS1

- *Draw, paint and sculpt
- *Understand the elements of art
- *Be inspired by the work of a range of artists, makers and designers

KS2

- *Use sketchbooks to develop ideas
- *Develop mastery of techniques
- *Develop an understanding of art that has come before

“Have the confidence to celebrate the places where pupils **diverge** from the task as this is a sign that they are owning their learning”

(AccessArt, 2022)

The 7 Elements of Art

Colour (tone)	Yayoi Kusama: Claude Monet
Pattern	Maurits Escher: Kenturah Davis
Texture	Keith Haring: Anni Albers
Line	Gerard Lovell: Anselm Keifer
Shape	Jackson Pollock: Zaha Hadid
Form	Hilda af Klint: Wassily Kandinsky
Space	Barbara Hepworth: Yinka Ilori
	Piet Mondrian: Kara Walker

“Teachers of the arts encourage **DIVERSITY** of response”

(Eisner, 2006)

Art, Craft & Design Knowledge Organiser

Assessment in Art, Craft & Design

Collect evidence of:

Curiosity, Persistence, Imagination
Collaboration and Discipline

Spencer et al (2012)

This could be through:

Children’s annotations, photographs, peer / self-assessment, and evaluations

Teachers should not write in children’s sketchbooks – they are a personal journal of artistic thinking.

Inclusive Practice in Art, Craft & Design

Inclusion in ACD

- ★ Check for understanding
- ★ Encourage individuality
- ★ Break down instructions
- ★ Display key vocab
- ★ Organise equipment to allow independence
- ★ Give options of tools, scale, and materials
- ★ Allow autonomy of material and subject matter
- ★ Provide examples that demonstrate a breadth of art and artists

CHOOSE A DIVERSE RANGE OF ART AND ARTISTS – EVERY CHILD SHOULD SEE THEMSELVES REPRESENTED IN YOUR ART CURRICULUM

Key Vocabulary

- Abstraction
- Realism
- Composition
- Perspective
- Symbolism
- Figurative
- Contemporary
- Complimentary
- Contrast
- Primary / Secondary colours

Key Pedagogies and Theories

Children should be:

FLUENT, EXPERIMENTAL, AUTHENTIC

...and understand these domains of art:

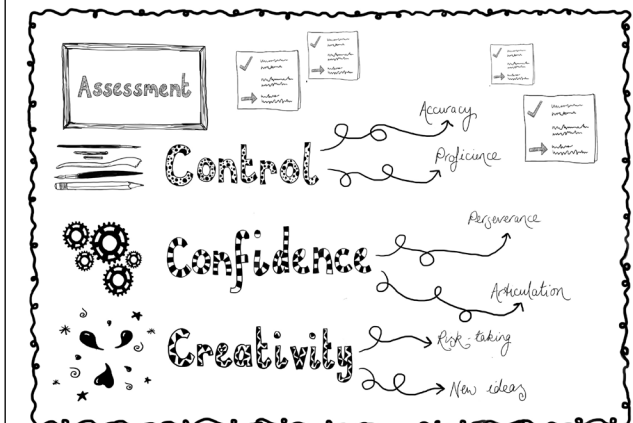

Practical – Skills for making
Theoretical – Art History
Disciplinary – Big questions of art

Ofsted (2023)

PLANNING A SEQUENCE OF LEARNING:

THINK ABOUT WHAT YOU ARE ASSESSING:

Join in!
Model creative thinking
Encourage and Inspire
Go on the journey together!

Subject:	Design and Technology
Completed by:	Lorna Williams & Gerard Doyle
Statement of Intent:	<p>Trainees will develop knowledge, skills and understanding in DT whilst exploring subject specific pedagogies. This will support the planning and delivery of a carefully sequenced, purposeful, and coherent primary DT curriculum. Specialist tutors and colleagues design, develop and review the ambitious DT curriculum based on up-to-date research. Trainees will gain a coherent knowledge and understanding of the principles of DT and the iterative design process through the research, design, make and evaluate sequence. Trainees will develop technical skills in materials, textiles, structures, and cooking and nutrition, enabling them to motivate pupils and teach effectively in their classroom practice. Trainees will think creatively and critically within a subject through discussions with expert colleagues.</p>
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Introduction to DT in relation to the EYFS/NC. • Introduction to the iterative design process. • Principles and strategies to teach the research, design, make and evaluate sequence of learning. • Subject skills and technical knowledge in structures (Moving Pictures *PG SB) and textiles (Puppets). • Plan DT 'big ideas' following the research, design, make and evaluate sequence of learning, sharing these with expert colleagues and peers. • Explore wider contemporary issues in DT: consider how DT has shaped our world (diverse roles e.g., female impact in DT); classroom management, resourcing, cross-curricular links, meeting the diverse needs of the learner and promoting inclusivity, SEND and EAL. <p>❖ Links to the CCF: Standard 3</p> <p>Key Research/Reading:</p> <p>⇒ Flinn, E. & Patel, S. DESIGN AND TECHNOLOGY (DT) OBSERVATION GUIDANCE

Does the lesson cover one of the following within the DT sequence of learning?

- Research
- Design
- Make
- Evaluate

Does the lesson give the opportunity for children to explore any of the principles of design?

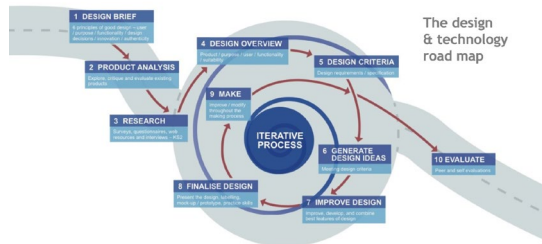

- User (who is it for?)
- Purpose (what is it for?)
- Functionality (how will it work?)
- Design decisions (what informed choices will be made?)
- Innovation (is the design original?)
- Authenticity (is it real, believable and can it be evaluated?)

Are there opportunities for the development of ideas, as well as making iterations?

Is there clear opportunity to explore and develop technical knowledge and skills within the DT lesson/sequence of learning as it develops?

Does the DT lesson/sequence of learning allow the opportunity to design and make purposeful and functional products that can be tested against a design criteria?

National Curriculum

The design & technology road map

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an **ITERATIVE PROCESS** of designing and making.

Aims:

- Develop creative, practical & technical expertise
- Build & apply a repertoire of knowledge, understanding & skills
- Critique, evaluate & test own & others' ideas & products
- Understand & apply the principles of nutrition & learn how to cook

DESIGN - Engage with and research ideas & products to inform designs

MAKE - Select tools, equipment, components & materials for aesthetics & increasing accuracy

EVALUATE - Investigate & analyse ideas and products against design criteria; understand how key events and individuals in design & technology have helped shape the world

TECHNICAL KNOWLEDGE - Secure structures, programming, mechanical & electrical systems

Design and Technology Knowledge Organiser

Assessment in Design and Technology

Focus on Design: understanding of contexts, users, and purposes; developing, modelling, and communicating ideas; researching relevant products and ideas

Focus on Make: capacity to plan for the use of appropriate tools, materials, and equipment; realisation of relevant practical skills and techniques - with accuracy

Focus on Evaluate: quality of communication in thinking about own ideas and products; consideration of others' views and, the intended product-user and purpose

Inclusive Practice in Design and Technology

Avoid a rigid approach curriculum design and delivery

Employ a variety of recording methods for designing, planning, and evaluating

Consider adaptation and adjustments for the child's access to the curriculum and their knowledge & skill development

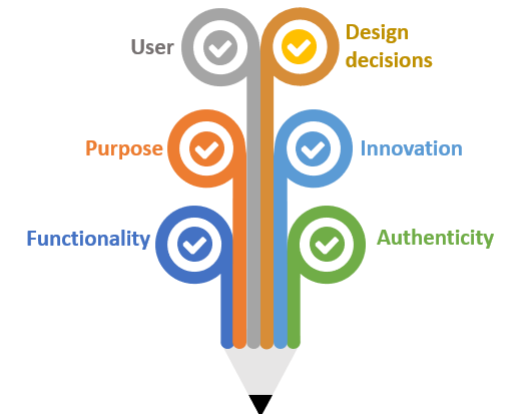

Encourage children to work as independently as possible

Key Vocabulary

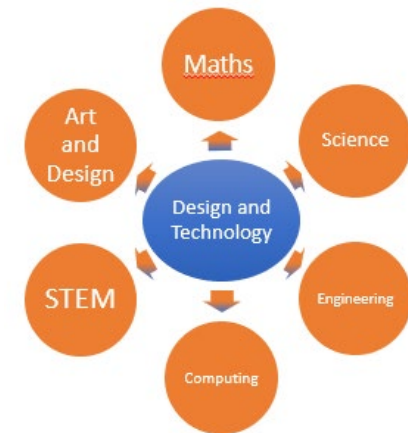

function join mechanism design equipment
 template tool draw cut practical
 develop material programme shape mock-up
 textile evaluate build cooking finish
 model make recipe ingredient
 structure product construct

Key Pedagogies and Theories

The 6 principles of good quality design projects

Design and Technology gives children the opportunity to develop skills, knowledge and understanding of designing and making functional products...it is vital to nurture creativity and innovation through design, and by exploring the designed and made world in which we all live and work.

Design and technology along with the other STEM subjects present the ideal context for development of a wide range of knowledge, understanding and skills

Subject:	Music
Completed by:	Julie Sutton
Statement of Intent:	<p>Trainees will develop subject specific knowledge, pedagogical skills and understanding to be able to plan and deliver carefully sequenced, purposeful and coherent music lessons. Specialist tutors and colleagues design, develop and review the ambitious Music curriculum based on up-to-date research. The music curriculum is so designed to develop trainees' confidence in understanding their own musical abilities and will equip them with a coherent knowledge and understanding to teach music effectively through the development of practical skills in composition, listening, appraising and performing. Progression is understood following the principle of the spiral curriculum through which the relationships between the inter-related dimensions and how they contribute to an overall performance are developed. Trainees will develop their musicality by thinking creatively and critically within Music and through discussions with expert colleagues.</p>
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Introduction to the National Curriculum for Music and EYFS. • Developing an understanding of the inter-related dimensions through practical engagement. • Exploring strategies for composition, listening, appraising and performing. • Subject skills and technical knowledge in rhythmic and graphic notation. • Exploring wider contemporary issues through listening and appraising; classroom management, resourcing, consideration of cross-curricular links and adaptive practice. <p>❖ Links to the CCF: Standards 2, 3 and 7</p> <p>Key Research/Reading:</p> <p>⇒ Daubney, A. MUSIC OBSERVATION GUIDANCE

Does the lesson include:

Aspects of singing, performing, composing, listening and appraising

- A focus on developing at least one of the inter-related dimensions (duration [rhythm and pulse], pitch, structure, texture, timbre, dynamics, tempo)
- Practical engagement with musical sound
- Opportunities to develop pupils' musical responses

Has progression in musical learning been considered?

- Is there improvement in the quality, depth and breadth of pupils' musical responses?
- Are opportunities provided for pupils to discuss, refine and improve individual and group compositions and performances?
- Are pupils encouraged to develop their musicality through appropriate questioning?
- Are children encouraged to discuss musical responses using appropriate musical vocabulary?
- Has the lesson been appropriately adapted to take different needs and abilities into consideration?

Does planning appropriately reflect the relevant age phase?

- Is appropriate reference made to the EYFS / NC?
- Are the songs and related activities relevant to the age phase and do they actively encourage musical understanding?
- Are children encouraged to be active listeners, focusing on developing their musical understanding?

Assessment

Is opportunity provided throughout the lesson for:

- Effective questioning which encourages children to make improvements to their musical responses?
- Individual, peer and group feedback resulting in refining and developing musical responses?
- Using music technology to record practical activity, listening, responding and refining to improve the quality of the response?

Recording through graphic, pictorial or standard notation?

National Curriculum

Key musical processes

Aims of the National Curriculum for Music

- Perform, listen to, review and evaluate music across a range of historical periods, genres, styles and traditions, including the works of the great composers and musicians
- Learn to sing and to use their voices, to create and compose music on their own and with others, have the opportunity to learn a musical instrument, use technology appropriately and have the opportunity to progress to the next level of musical excellence
- Understand and explore how music is created, produced and communicated, including through the inter-related dimensions: **pitch, duration, dynamics, tempo, timbre, texture, structure and appropriate musical notations.**

Children use what they have learnt about media and materials in original ways, thinking about uses and purposes. They represent their own ideas, thoughts and feelings through design and technology, art, music, dance, role play and stories.

Expressive Arts & Design: Being imaginative

EARLY YEARS FOUNDATION STAGE

Expressive Arts & Design: Exploring and using Materials

Children sing songs, make music and dance, and experiment with ways of changing them. They safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.

National Plan for Music Education DfE, 2022

Model Music Curriculum, DfE, 2021

Music Knowledge Organiser

Assessment in Music

Formative Assessment is integral to all music practice.

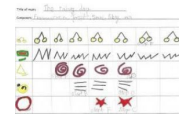

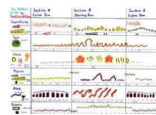

Questioning

Feedback

Self Assessment

Peer Assessment

Assessment through Graphic scores / Pictorial representations / Recording and refining

ISM Assessment and Progression Framework for Music (Daubney & Fautley, 2019)

Inclusive Practice and Diverse Representation in Music

As Primary Educators, we can teach the evolution of music, rather than giving the children facts about people and sounds that seem unrelated.

We can show the children how to look behind the history books and find the influences, the gender, the race, the religion, the historical, geographical, sociological, psychological, technological and emotional context of the composer, genre and particular pieces of music in order to understand differences and celebrate similarities.

We can use our understanding of our own musical journeys to apply this to the National Curriculum and how we find the people behind the music as we learn about Music History, performance, composition and through active listening and appraisal of a variety of genres of music.

Key vocabulary and The Inter-related Dimensions of Music

Inter-related dimensions of Music-

Duration (Rhythm / Pulse)

Tempo

Pitch

Dynamics

Structure

Timbre

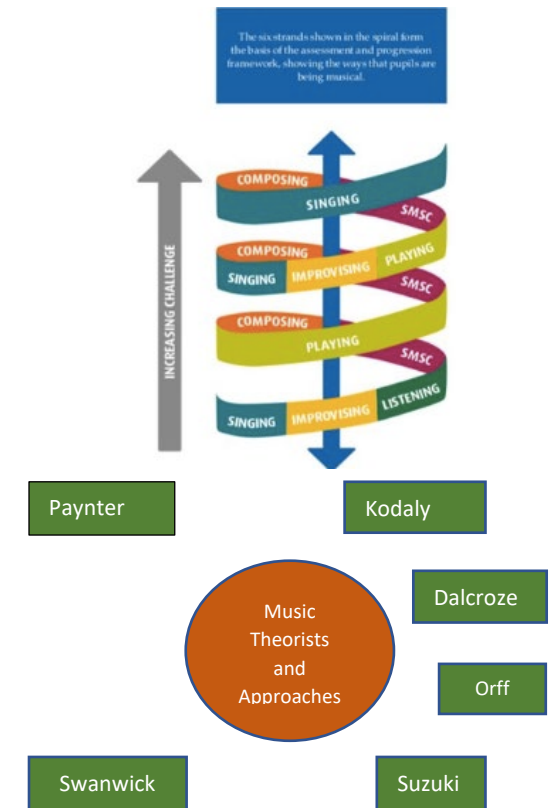

Texture

Beat, Pulse, perform, unison, structure, ostinato, composition, tuned, untuned, percussion, graphic score, notation, soundscapes, call and response, pentatonic scale, melody, harmony, drone and names of instruments.

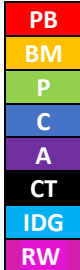

Key Pedagogies and Theories

Our role is to show the children what makes music, how the interrelated dimensions of music evolve through finding relevance in the people behind the music and through purposeful integration of knowledge and skills.

The main strands of the Music National Curriculum (Singing, Performing, Composing [and Improvising], Listening and Appraising) are often interwoven, with the Music Curriculum being seen as a Spiral Curriculum, linking with the theorist Bruner.

- Development of our own unique musical timelines
- Practical exploration of Global Traditions in Music (including Western Music)
- Understanding of the History of Music
- Musical planning and progression
- Adaptive teaching strategies

Subject:	RE
Completed by:	Lynn Johnston
Statement of Intent:	The intent for Religious Education (RE) on the PGCE course at the University of Worcester is to ensure trainees are equipped with the subject knowledge, pedagogical skills and ability to plan, teach and assess inspiring RE across EYFS, KS1 and KS2. The curriculum demonstrates and encourages RE to be taught using engaging approaches alongside the other Foundation Subjects as part of a Broad and Balanced curriculum. Expert tutors ensure the RE curriculum content is current and ambitious based on up-to-date knowledge and research. The ambitious curriculum looks at local and global contentious issues whether they relate to religious or non-religious views.
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Policy and frameworks in RE. • The RE curriculum in EYFS, Key Stage 1 and Key Stage 2. • Using a Locally Agreed Syllabus / Planning for creative and meaningful RE. • Introduction to assessing RE. • Subject knowledge, based on the six world religions covered within Primary Education (Abrahamic faiths: Judaism, Christianity, Islam; Dharmic faiths: Hinduism, Buddhism, Sikhism), Non-Religious Worldviews. • Wider issues within RE (controversial issues, inclusion, diversity, links to SMSC). <p>❖ Links to the CCF: Standards 3, 4 and 6</p> <p>Key Research/Reading:</p> <p>⇒ McCreery, E., Palmer, S. and Voiels, V. (2017) <i>Teaching religious education: primary and early years</i>. Exeter: Learning Matters.</p> <p>⇒ Teece, G. <p>UW Curriculum Links</p> 	

RELIGIOUS EDUCATION (RE) OBSERVATION GUIDANCE

Good practice in planning:

- **Use of a Locally Agreed Syllabus (LAS) or the school's RE curriculum**
- **Considered the sensitive nature of RE**
- **Acknowledged any children that may be withdrawn from RE**
- **Opportunities to develop subject knowledge, skills and communicate/express ideas**
- **Use of range of assessment opportunities**

Good practice in the lesson:

- **Use of questions**
- **Address any misconceptions that may be offensive**
- **Practical element (use of artefacts, photos, videos etc.) to bring RE to life**
- **'Real life' links, i.e., links to children's own beliefs, religions and values**
- **Opportunity for discussion to share views/own opinions in safe environment**
- **Links to other religions, beliefs and values**

Curriculum

Principal aim

Religious Education sits outside the DfE National Curriculum and is covered by local curriculum documents (e.g. Locally Agreed Syllabus). The principal aim of religious education is to explore what people believe and what difference this makes to how they live, so that pupils can gain the knowledge, understanding and skills needed to handle questions raised by religion and belief, reflecting on their own ideas and ways of living.

	Questions about the meaning & purpose of life.		Systematic knowledge & understanding of beliefs.
	Religions and beliefs in local, national & global contexts.		Dialogue & respect for diversity.
	Evaluation and respectful response.		Interpretation & articulation of own beliefs.

Substantive Knowledge:

EYFS

In the EYFS RE sits within PSED and Knowledge & Understanding of the World.

Developing a positive sense of themselves & others, & learning how to form positive and purposeful relationships.

Beginning to understand and value the differences of individuals & groups within their own community.

Children will have the opportunity to develop their emerging moral and cultural awareness.

Key Stage 1 and 2

Substantive knowledge is laid out in individual curriculum documents (e.g. Locally Agreed Syllabus). The UoW curriculum respects the following principles:

A Making sense of a range of religious and non-religious beliefs.

B Understanding the impact and significance of religious and non-religious beliefs.

C Making connections

Religious Education Knowledge Organiser

Assessment in Religious Education

Can assess:

Knowledge, for example factual knowledge about Christian worship.

Understanding, for example of concepts such as belief, commitment, forgiveness. **Skills**, for example ability to interpret through drawing meaning from artefacts, works of art, texts, symbols.

Cannot assess:

How "religious" or "spiritual" a person is.

Levels of spiritual or moral development.

Inclusive Practice in Religious Education

Togetherness... Equality... Participation... Acceptance.

Opportunities for all learners to express their views. People of all faiths & no faith feel valued, respected and one of the team.

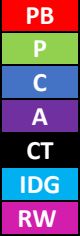

Follows principles of Inclusion by Design.

Key Vocabulary

- empathy
- expression
- communication
- tolerance
- faith
- respect
- reflection
- diversity
- values
- cooperation
- belonging
- beliefs
- community

Key Pedagogies and Theories

Phenomenology	Ninian Smart The "seven dimensions" of religion: ritual, practice, narrative, doctrinal, ethical, social and material.
Concept Cracking	Trevor Cooling Evaluating claims to truth by understanding the underlying concepts.
Critical Realism	Andy Wright Discovering and critiquing truth claims.
Human Development	Michael Grimmitt Development of spiritual understanding. Students are spiritual beings and this aspect of their self needs to be educated and developed.
Interpretive Approach	Robert Jackson Exploring and responding to individuals and their experiences of religion.
Spiritual Development	David Hay Experiences of religion and religious practice, using the senses and extensive use of role-play, drama, dance and other sensate activities.
Deconstructionism	Clive Erriker Understanding and deconstructing the world-views that religions propagate and building world-views of their own.
Contextualisation	Liam Gearon Religious traditions as part of historic and current cultural and present day realities.

Subject:	Computing
Completed by:	Dan Whittaker (lead), Fran Dockerty
Statement of Intent:	<p>Within our computing curriculum, we aim to equip our trainees with computing teaching competence and confidence so they are able to teach their own pupils successfully. A key part of the computing national curriculum is the 'computer science' strand (BERRY REF) which incorporates the fundamental concepts of coding, coding for a purpose and computational thinking. Trainee teachers traditionally arrive into initial teacher training with a low concept of their computing knowledge and confidence for this strong. As a result, we wish to empower trainees and their pupils by providing them with this computing content knowledge in a way that develops their confidence. We aim to embed this content knowledge within computing-specific pedagogical considerations and approaches so our trainees can critically appraise both traditional and cutting-edge teaching approaches so they are best able to support their own pupils.</p>
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Exploring the computing national curriculum, including (Berry, 2013): <ul style="list-style-type: none"> ○ How it can be split into 'computer science' (CS), 'information technology' (IT) and 'digital literacy' (DL). ○ The phase-specific expectations of computing teaching and learning. ○ Key subject knowledge, particularly relating to the computer science strand. • Computing subject knowledge in various pedagogical approaches so the students can begin to deconstruct and identify effective practice in context. For example: • Teaching algorithms using unplugged approaches. • Teaching computational thinking and coding concepts using UMC (Lytle et al, 2019) – use, modify, create – and PRIMM (Sentance et al, 2019) – predict, run, investigate, modify, make. • Explore general and computing specific research – including cutting edge evidence-based practice – and its implications to practice, including: <ul style="list-style-type: none"> ○ Cognitive Load Theory (Shibli and West, 2018) ○ Rosenshine's principles of instruction (Rosenhine, 2012) ○ PRIMM (Sentance et al, 2019), UMC (Lytle et al, 2019) • Links to the CCF: Standards 2, 3 and 4 <p>Key Research/Reading:</p> <p>⇒ Berry, M. COMPUTING OBSERVATION GUIDANCE

Does the lesson cover one of these aspects of the computing curriculum (after CAS, 2013, p. 5)?

- **Computer Science (CS)**—the foundation

Creating logical algorithms/programs/instructions to complete a task, debugging (correcting) mistakes, understanding computer networks (e.g., the internet).

- **Information Technology (IT)** – the implementation

Use technology purposefully to create, organise, store, manipulate and retrieve digital content to accomplish given goals.

- **Digital Literacy (DL)** – the implication

Using technology safely, respectfully and responsibly to make the most of its opportunities while protecting yourself and others around you.

Are key vocabulary and key concepts explained or explicitly acknowledged throughout the lesson?

Where computing is often taught with a cross-curricular approach, which is taking a greater role (such as most time or cognitive resources): computing or the content/project/product? For example, if programming a history quiz game, is it the planning, creating or debugging the program or the history content that is taking up most time/cognitive resources?

Does the teacher explicitly address computing-specific concepts (such as sequencing or variables), or does this get lost while focusing on the project/product?

Can the teacher justify the software/hardware used or the choice of cross-curricular links?

Are safeguarding and online safety concerns identified and addressed? e.g., safe management of search engines to avoid inappropriate content or teaching pupils what to do if they witness cyberbullying.

Subject:	PSHE
Completed by:	Victoria Pugh
Statement of Intent:	The PSHE ITE curriculum allows students to develop their subject knowledge, skills and understanding of key issues within PSHE education. Trainee teachers will explore the statutory relationships, sex and health education (RSHE) curriculum as well as the wider PSHE curriculum which includes living in the wider world, environmental sustainability, aspirations and financial education topics. Trainees will explore the use of a spiral curriculum which shows careful sequencing of lessons to ensure subject knowledge acquisition and progression. The UW PSHE curriculum is closely linked to current affairs, key issues in social justice and diversity and equality themes. Trainees are encouraged to develop confidence in teaching sensitive issues using a culturally responsive and trauma informed approach. The intent for the PSHE ITE programme is to support trainees to deliver meaningful, theory informed PSHE lessons which support the academic and holistic development of the pupils they teach.

PERSONAL, SOCIAL, HEALTH AND ECONOMIC EDUCATION (PSHE) OBSERVATION GUIDANCE

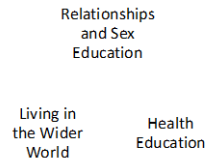

Does the lesson cover one of the following aspects of PSHE education?

- Relationships Education (statutory)
- Health Education (statutory)
- Sex Education (non-statutory)
- Economic Education (non-statutory)
- Global and environmental Education (non-statutory)
- Citizenship Education (non-statutory)
- Has the lesson been linked to specific objectives taken from the DfE Relationships, Sex and Health Education guidance (2019) or from the PSHE Association 'Living in the Wider World' objectives?
- Has the teacher co-created with or drawn pupils' attention to ground rules which must be followed during the lesson?
- Are there opportunities for pupils to discuss subject content, develop particular, new skills or develop existing skills? How do they plan to progress this knowledge, or the skills developed in future lessons?
- Do pupils have the opportunity to voice their opinions or ideas in a range of ways? Do these strategies take into account the need for distancing from some topics which might be sensitive? These might include, graffiti walls, role play, journals, cartoon strips and scenarios.
- Is the teacher aware of any aspects of a pupil's life which may need to be taken into consideration prior to the session due to the sensitive/personal nature of a topic? E.g., talking about loss if a child's grandparent or loved one has recently died.
- Are PowerPoint images, language and topics shown, used or discussed inclusive and take into account diversity in relationships, body image, gender identity and race and culture?
- Has the teacher considered any "difficult" questions which might be raised within the session and ways in which they would deal with these?
- How has the teacher chosen to assess the content or skills learnt during the lesson? Is the assessment inclusive in nature and is it sensitive to the topic being respectful that some children may not want to share their ideas (e.g., if discussing what makes a friendship unhealthy some children may not wish to share this if they are experiencing unhealthy friendships or relationships within their own lives).
- Has the teacher shown a clear understanding, or can they talk about how they would deal with any disclosures which might be made within a PSHE lesson and how this links to the PSHE policy and Safeguarding?

National Curriculum

PSHE is not part of the National curriculum, however Relationships and Health Education are STATUTORY for all primary schools.

PSHE (don't forget the economic !)

R(S)HE within PSHE

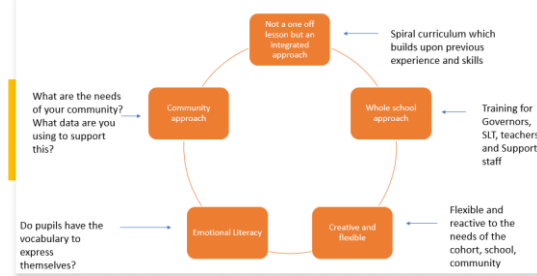

Schools should tailor their PSHE to reflect the needs of their pupils.

We expect schools to use their PSHE education programme to equip pupils with a sound understanding of risk and with the knowledge & skills necessary to make safe & informed decisions.

- Pupil Voice
- Safe Space
- Self - Awareness
- Empathy
- Puberty
- Health Education
- Personal, Social, Health and Economic Education
- Living in the wider world
- Relationships education

Key Pedagogies and Theories

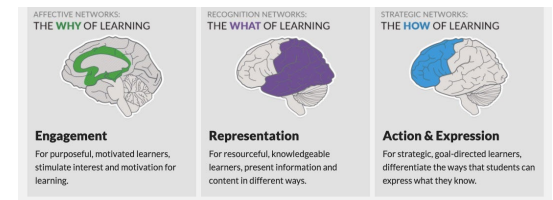

From – To grid showing shift in the role played by pupils in an active classroom environment

From:	To:
Being passive recipients of knowledge	Active and participatory learners
Focus on answering questions	Asking questions
Being 'spoon fed'	Taking responsibility for their own learning - reflective learners
Competing with one another	Collaborating in their learning
Wanting to have their own say	Actively listening to opinions of others
Learners of individual subjects	Connecting their learning

From – To grid showing shift in the role of the teacher in creating an active classroom environment

From:	To:
Teacher-centred classroom	Learner-centred classroom
Product-centred learning	Process-centred learning
Teacher as a 'transmitter of knowledge'	Teacher as an organiser of knowledge
Teacher as a 'doer' for children	Teachers as an 'enabler', facilitating pupils in their learning
Subject-specific focus	Holistic learning focus

These changes in the role of the teacher will inevitably result in transforming the role of pupils in the classroom.

UDL FRAMEWORK

Priority area:	Behaviour
Completed by:	Andrew Taylor
Statement of Intent:	At the University of Worcester (UW) we aim to create teachers who are confident at managing behaviour and are equipped with a range of strategies and the skills to reflect on the effectiveness and impact of these strategies on the behaviour of the pupils they work with throughout their training and beyond. Behaviour management is not seen in isolation and is integrated into other subject areas. Trainees are clear that behaviour management is not only an integral part of their classroom practice but enables pupils to be a productive member of the wider school, local and global community. This creates learning environments that are safe and secure for pupils, allowing them to thrive and perform to the best of their ability.
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <ul style="list-style-type: none"> • Trainees understand the impact of their own behaviour on their teacher presence and pupil behaviour. • Trainees will develop the understanding of the importance of building positive relationships with the students that they teach. • Trainees know the importance of having clear expectations for pupils' behaviour that they communicate clearly. <p>❖ Links to the CCF: Standard 7</p> <p>Key Research/Reading:</p> <p>⇒ Paige, R., Lambert, S. and Geeson, R. (2020) <i>Building skills for effective primary teaching: a guide to your school-based training</i>. 2nd edn. London: Learning Matters.</p> <p>⇒ Roffey, S. (2010) <i>Changing behaviour in schools: promoting positive relationships and wellbeing</i>. London: Sage.</p> <p>⇒ Bennett, T. (2020) <i>Running the Room: The Teacher's Guide to Behaviour</i>. John Catt Educational.</p> <ul style="list-style-type: none"> • Behaviour management is viewed through the lens of meeting individual pupils needs and specific to the context • Trainees develop an understanding that behaviour management strategies may need to be adapted to meet individual pupils' needs • Trainees further develop a range of strategies through placement experience and the importance of clear expectations and how these are communicated to pupils <p>❖ Links to the CCF: Standard 7</p> <p>Key Research/Reading:</p> <p>⇒ Ellis, S. and Tod, J. (2018) <i>Behaviour for learning: promoting positive relationships in the classroom</i>. 2nd edn. London: Routledge.</p>
<p>UW Curriculum Links</p> 	<ul style="list-style-type: none"> • Trainees identify how their values and beliefs shape the way they support the behaviour of pupils • Trainees continue to develop and refine their use of behaviour management strategies including moving from intrinsic to extrinsic motivation CCF 7.6 • Trainees reflect on the strategies they have seen and used and the underpinning research/theory and can make informed choices about the strategies they choose to use. <p>❖ Links to the CCF: Standard 7</p> <p>Key Research/Reading:</p> <p>⇒ Rogers, B. (2015) <i>Classroom behaviour: a practical guide to effective teaching, behaviour management and colleague support</i>. 4th edn. Los Angeles: SAGE.</p>

1. Establishing and reinforcing routines, including through positive reinforcement, can help create an effective learning environment.
2. A predictable and secure environment benefits all pupils, but is particularly valuable for pupils with special educational needs.
3. The ability to self-regulate one's emotions affects pupils' ability to learn, success in school and future lives.
4. Teachers can influence pupils' resilience and beliefs about their ability to succeed, by ensuring all pupils have the opportunity to experience meaningful success.
5. Building effective relationships is easier when pupils believe that their feelings will be considered and understood.
6. Pupils are motivated by intrinsic factors (related to their identity and values) and extrinsic factors (related to reward).
7. Pupils' investment in learning is also driven by their prior experiences and perceptions of success and failure.

Behaviour Management Knowledge Organiser

Assessment in Behaviour Management

Observations can be used to identify Antecedents, Behaviours and consequences.

ABC

This can then be used to support pupils and minimise behaviour incidents

Inclusive Practice in Behaviour Management

Behaviour is viewed through the lens of pupil needs.

A consistent approach to behaviour is needed to support all pupils

Key Vocabulary

- Behaviour support
- Rewards
- consequences
- Distressed behaviour
- Intrinsic motivation
- Extrinsic motivation

Key Pedagogies and Theories

Teachers need to manage their own behaviour and emotions to manage pupil behaviour effectively

Relationships are key to managing pupil behaviour.

Clear and consistent routines support pupils with behaviour expectations.

Consistent and appropriate responses support positive relationships and should be used to reinforce consistent routines

Pupils are motivated by both extrinsic and intrinsic factors. Intrinsic motivation has a longer lasting effect on motivation

Priority area:	English as an Additional Language
Completed by:	Gerard Doyle
Statement of Intent:	<p>Focus on the knowledge and skills that teachers require for planning, teaching and assessing EAL learners in primary schools and early years settings. Research informed pedagogy for local and national contexts</p> <p>The curriculum is divided into two parts: Part one: Discrete sessions on theories and pedagogies of language acquisition, the national context, inclusion and diversity for EAL learners and, progression, planning and assessment for EAL. Inclusion

Setting suitable challenges

4.1 Teachers should set high expectations for every pupil. They should plan stretching work for pupils whose attainment is significantly above the expected standard. They have an even greater obligation to plan lessons for pupils who have low levels of prior attainment or come from disadvantaged backgrounds. Teachers should use appropriate assessment to set targets which are deliberately ambitious.

Cummins' Planning Framework

Responding to pupils' needs and overcoming potential barriers for individuals and groups of pupils

4.5 Teachers must also take account of the needs of pupils whose first language is not English. Monitoring of progress should take account of the pupil's age, length of time in this country, previous educational experience, and ability in other languages.

4.6 The ability of pupils for whom English is an Additional Language to take part in the national curriculum may be in advance of their communication skills in English. Teachers should plan teaching opportunities to help pupils develop their English and should aim to provide the support pupils need to take part in all subjects.

English as an Additional Language Knowledge Organiser

Assessment in EAL

Build up a profile of the child learning EAL to gain a broader picture

- First language proficiency and literacy practices
- Previous education and attainment
- Child's background in and exposure to English
- Family, cultural, and religious background

Adopt and embed an EAL assessment framework

English language proficiency + Curriculum understanding

Identify needs to plan for individualisation of learning and promote potential development. Plan for English language use and development across the curriculum and learning contexts.

EAL and SEND

Speaking English as an Additional Language is NOT a Special Educational Need or Disability

Sometimes specific learning needs are difficult to identify if the child is not fluent in English

Slow progress may be related to the child's age and their time of arrival in the school year, gaps in previous education, proficiency, and literacy in the child's first language.

Persistently low scores in non-verbal tests might suggest an additional need.

Assessments using a child's first language can provide an indication of potential learning needs.

Proficiency in English is the strongest predictor of academic achievement (Strand and Hessel, 2018)

Safe and welcoming environments

Authentic engagement with and response to children's experiential knowledge and individual identity

Promote social support and peer relationships

Assess English language proficiency and adapt curriculum input accordingly

Use of the child's first language (L1): preview texts with elements of L1; use of translation to support understanding; use of L1 to ease cognitive load and allow learners to focus on lesson objectives

Reduce cognitive load through use of visuals and artefacts

Plan for academic language development – planning for talk, vocabulary, and language structures

Use of good models of English language and small group work

Check for children's understanding to promote comprehension

Sensitive recasting of grammatical errors

Develop critical awareness of own use of language – idioms and metaphors

Some aspects of our provision do not require every element within this subject booklet.
Therefore, on the following pages you will find:

- A knowledge organiser for our Diversity, Inclusion and Global Citizenship curriculum area
- Lesson Observation guidance for EYFS lessons
- A subject page for our Wellbeing and Resilience for All curriculum area.

National Curriculum

The SEND Code of Practice (2014)

The code explains that local authorities (LAs) must ensure that children, their parents, and young people are involved in discussions and decisions about their individual support and about local provision.

Early years providers, schools and colleges should also "take steps to ensure that young people and parents are actively supported" in contributing to needs assessments, developing and reviewing education health and care (EHC) plans.

The assessment and planning process should enable parents, children and young people to express their views, wishes and feelings, and to be part of the decision-making process

The Equality Act (2019)

On 1 October 2010, the Equality Act 2010 replaced all existing equality legislation such as the Race Relations Act, Disability Discrimination Act and Sex Discrimination Act. It consolidated this legislation and also provided some changes.

In England and Wales, the Act applies to all maintained and independent schools, including academies, and maintained and non-maintained special schools.

The Act provides a single, consolidated source of discrimination law.

In a school setting the general principle is that you have to treat pupils equally regardless of race, gender or sexuality - but you may be required to treat disabled pupils differently, in a more favourable way.

SUSTAINABLE DEVELOPMENT GOALS

Key Vocabulary

- Decolonisation
- Sustainable Development Goals
- Inclusion
- Diversity
- Representation
- Medical Model
- Adaptive Teaching
- Specific Learning Difficulties
- Adverse Childhood Experiences (ACEs)
- Equality
- Social Model
- Quality First Teaching

Diversity, Inclusion and Global Citizenship Knowledge Organiser

Key points from the COP

<p>Focus on the child or YP as an individual</p> <p>Be easy for children, young people and their parents to understand and use clear ordinary language and images, rather than professional jargon</p> <p>Highlight the child's or young person's strengths and capacities</p>	<p>Enable the child or young person, and those who know them best, to say what they done and is interested in and what outcomes they are seeking in the future</p> <p>Tailor support to the needs of the individual</p> <p>Organise assessments to minimise demands on families</p>	<p>Bring together relevant professionals to discuss and agree the overall together approach</p> <p>Deliver an outcomes-focused and co-ordinated plan for the child or young person and their parents</p>
---	---	--

The Graduated Approach

Assessment in Diversity, Inclusion and Global Citizenship

	Culturally responsive journey				
What to do	ID pupil assets	Consider pupils' cultural 'funds of knowledge'	Consider pupil's cultural values	Language	Create a welcoming classroom
What to look for	e.g. cultural background, interests, strengths, talents	e.g. relevant cultural historical figures, info about pupils' communities	Ways to bridge to pupils' cultures thoughtfully.	Many students code switch – change dialects and accents – to suit the situation. Support this.	The messages your classroom walls and materials give about diversity
How	Conversations, questionnaires, paying attention	Avoid asking too many direct Qs – it can 'other' and diminish trust.	Give opportunities to share about pupils' lives and culture	Use music, poetry, expressive arts, support them in using language appropriate to the context	Consider who's represented in displays, books, worksheets etc.

Inclusive Practice in Diversity, Inclusion and Global Citizenship

The way we present information – Representation – The way we structure lessons – Questioning – Feedback – Tasks

Key Pedagogies and Theories

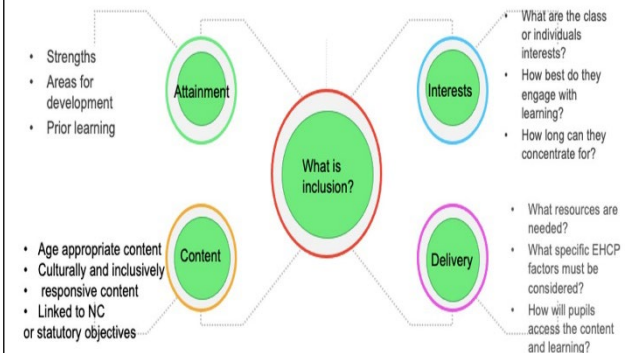

Protected Characteristics

'One of the key ingredients of an inclusive classroom is a flexible approach to teaching that may, when appropriate, be adapted to address educationally significant differences among students' (Westwood 2018 pg 60)

Janney and Snell (2013) have stated that it makes more sense to improve general teaching practices to the benefit of all students, rather than making adaptations only for specific students with disabilities. (Westwood 2018 pg 76)

What is planning for inclusion?

EARLY YEARS FOUNDATION STAGE OBSERVATION GUIDANCE

When observing teaching and learning in the EYFS, children may be engaged with a range of opportunities covering all areas of development. The four overarching principles of the EYFS and the following question prompts, provide a framework for observing students.

The unique child:

- Is there a respectful relationship and acknowledgement that all children are individuals?
- Does the student respond to the individuals' needs, scaffolding the child's interests and curiosities?

Positive Relationships:

- Does the student Interact with children, using age-appropriate language and open body language?
- Is praise used effectively to reinforce learning and behaviour for the children?
- Are children being supported to feel confident and secure?
- Are activities adapted to each child's ability?
- Do activities provide challenges to all children?
- Are there clear routines that support the children?

Enabling Environment:

- Is the learning environment rich and stimulating and do planned opportunities (focussed activities and continuous provision) reflect the learning taking place?
- Are children's interests reflected in the planning in order to keep them interested and motivated?
- Are resources for focussed activities and planned continuous provision well organised and age appropriate?
- Are there opportunities for children to work collaboratively and independently within the learning environment?
- Are there opportunities for the children to self-select and learn through child-initiated play?
- Has the student used their knowledge of the EYFS to plan continuous provision opportunities (utilising the indoor/outdoor area)?

Learning and Development:

- Has the student planned for opportunities that build upon what the children already know?

- Does the student use a multi-sensory approach to support learning and development? (e.g., visual aids, movements, touch, sound)
- Are activities appropriately pitched to support children to develop key skills?
- Are open-ended questions used, allowing the child time to answer?
- Do the students' interactions with children help to identify next steps in learning?
- Is the student using ongoing assessment through observation, questioning and looking at individual outcomes?
- Is new vocabulary introduced and explored as part of the learning?
- Has adult support been deployed effectively within the learning environment (to support focussed or child-initiated activities)?
- Are there opportunities for the children to take the initiative and lead learning?

Priority area:	Wellbeing and Resilience for all
Completed by:	Suzanne Allies
Statement of Intent:	Trainees are encouraged to develop a pro-active and autonomous approach to prioritizing their own wellbeing; in addition, they learn the skills and knowledge about how best to appropriately support the wellbeing of pupils. They create a personal toolkit of ideas and are supported with care packages throughout their training.
<p style="text-align: center;">Building</p>  <p style="text-align: center;">Enriching</p>  <p style="text-align: center;">Thriving</p>	<p>How the content is sequenced:</p> <p>Trainees are introduced to how to support their own wellbeing at the pre-Induction (July) and the induction (September). They create a wellbeing toolkit, learn about stress and self-care, and engage with the first care package about sleep.</p> <p>Each month trainees receive a care package: 2: Wellbeing promise, 3: Exercise & rest, 4: Being in the moment, 5: Resilience, 6: Tips to manage stress, 7: Boosting immunity.</p> <p>Key Research/Reading:</p> <ul style="list-style-type: none"> ⇒ Allies, S. (2021) <i>Supporting Teacher Wellbeing: a practical guide for primary teachers and school leaders</i>, Abingdon: Routledge. ❖ Links to the CCF: Standard 8 <p>Trainees now develop on the knowledge they have about their own wellbeing needs to learn about how to appropriately support pupil wellbeing. Two sessions introduce common mental health needs in children, reflects on stigma and discrimination, and highlights the importance of a whole-school approach to supporting wellbeing. Practical ideas are shared of how to support pupils and draw from specialist support, especially related to anxiety. Whilst in school, trainees work with expert colleagues to learn effective time management skills to maintain a life-work balance etc.</p> <p>Key Research/Reading:</p> <ul style="list-style-type: none"> ⇒ Glazzard, J. & Bligh, C.
