

Important Panopto Browser Guidance

For all University systems, it is recommended that staff and students use either Chrome or Firefox as their web browser. This is especially important when using Panopto, or accessing Blackboard modules, that have Panopto videos embedded in them. Some students have reported being automatically logged out of Blackboard. In every case, they were using Internet Explorer, Microsoft Edge or Safari to access pages where Panopto videos were hosted.

If you use Panopto, we would be grateful if you could reiterate to students that, if they use Chrome or Firefox, as indicated on their student homepage, they should not experience problems.
