

# Animal Biology degrees

## Key features of this course:

Our Animal Biology programmes follow animal life from the functioning of the not-so-simple cell to the control and co-ordination of complex processes enabling animals to survive and reproduce in their given contexts.

---

When you choose to combine Animal Biology with another subject in a Joint Honours degree you will not receive the Royal Society of Biology accreditation as this pathway does not provide full coverage of mandatory curriculum content. However, there is flexibility to switch to Single Honours at the end of the first year if you wish to receive an accredited Animal Biology degree.

## Animal Biology degrees

### Single Honours

[Animal Biology BSc \(Hons\)](#)

The following Single Honours degrees may also be of interest:

[Biology BSc \(Hons\)](#)

[Human Biology BSc \(Hons\)](#)

### Joint Honours

[Animal Biology and Ecology BSc \(Hons\)](#)

Visit the [Biology degrees page](#) and the [Human Biology degrees page](#) to find out how to study as Joint Honours.

Visit our [Joint Honours page](#) to find out more about studying subjects in combination at the University of Worcester.
